

# INTERCULTURAL-ENVIRONMENTAL VOLUNTEERING IN GREECE

## ***Help to keep Rivkas's "Path of Memory" alive***

**We are looking for 2 volunteers for *October 2018 and May 2019.***

Volunteer with FILOXENIA for 1-month in-between mountains and the sea in the beautiful Kryoneri in Greece.

During 1943, the six-year-old Rivka fled with her family from the Nazis to Kryoneri. The Greek partisans saved their lives by hiding them in a cave near the city. They survived and after the occupation they moved to Israel. 74 years later, Rivka's family returned to the little village to show their gratitude to the residents by reconstructing the amphitheater of the village. The next project is to clean up the footpath that leads to the Karamanos cave, where the family hid. Rivka wanted so much to show it to her family and now you can be part of the incredible story and help to keep this sign of humanity and positive motivation alive.

**Tasks of the program** are cleaning up the environmental footpaths guiding to the Karamanos cave and building wooden equipment for the footpath like banks, stairs, etc. You will also develop memory points, mosaics, panels and construct signs for the path. Video documentation will also be part of the project.

Enjoy activities with other international volunteers like getting to know the food and farming culture, eating organic food, learning Greek dances, mountain biking, hiking and many more.
